Alex, BSOH (to whom it may concern),

RIVM in the Netherlands has reviewed two main documents to assess compliance against OEL's when using monitoring data:

- EN689
- NVVA-BOHS Guidance (BW-STAT)

The report is attached, it is in Dutch and includes an English summary. Over the years, NVVA, BSOH as well as BOHS have been collaborating to influence the direction of EN689 and we are of course still proud that we published our own guidance. Hence I though you would be interested in the attached, please forward this message to whom you feel are interested.

I am not involved in the NVVA Board anymore, my successor is Andrea Hiddinga.

Margreet
