

For our client, the Nickel Institute, we are looking for an Industrial Hygienist. Nickel Institute is the global association of the world's primary nickel producers. The mission of the Nickel Institute is to promote and support the use of nickel in appropriate applications. It grows and supports markets for new and existing nickel applications and promotes sound science, risk management and socio-economic benefit as the basis for public policy and regulation. Nickel Institute is the Centre of excellence for information on nickel and nickel-containing materials and has offices in Asia, Europe and North America. For the Nickel Institute's Brussels office we are looking for an Industrial Hygienist.

Industrial Hygienist (M/F)

The job:

The main purpose of the job is to support the regulatory team on technical and scientific aspects related to industrial risk management. The Industrial Hygienist will support the REACH manager on technical input into exposure and use scenarios in the REACH files, and will provide technical and scientific support on topics related to occupational exposure, ambient air standards etc. Tasks and responsibilities include, but are not limited to:

- Providing input and advice to the Members of the Nickel Institute and downstream users, with respect to workplace legislation and protection of workers, exposure to nickel and nickel compounds, methods to measure workplace exposure, speciation, particle size distribution, etc.
- Attending meetings related to exposure scenarios and providing advice regarding description of processes.
- Liaising with external consultants.
- Providing support on other regulatory developments where expertise on use and exposure in applications is needed and interacting with regulatory authorities on those topics.
- Managing regulatory and technical developments with respect to workplace legislation and ambient air standards at global level.
- Participating in meetings of Eurometaux and the ICMM related to development of technical and scientific tools for metals and metal compounds in close cooperation with the science department.

Your profile:

- You have a Master's degree
- You have a minimum of 5 years of experience of workplace exposure in industrial settings
- You understand exposure risk management (environment, workers, general population)
- You are an excellent communicator, with a high standard of oral and written English
- You have excellent skills in networking and developing interpersonal relationships across cultures
- You are a teamplayer
- You are willing to travel up to 15-20% of the time (principally in Europe, with some intercontinental travel)

The offer:

The role of Industrial Hygienist at the Nickel Institute is varied with a broad perspective. You are dealing with industry-wide issues. You work in an international environment in a highly professional and motivated team. The Nickel Institute is a stimulating place to work with a very good and highly collaborative team atmosphere. Your office is located in the European Quarter in Brussels, easily reachable by public transport. You will be offered an attractive salary package with fringe benefits such as meal vouchers, group and hospital insurances, free public transport, bonus and all tools needed for the job.
